tekna.**Design Concept:**

Ice Cream Land Game is a fun game where there are controllers, and the cord is 6 feet long, so everyone is being socially distanced. There are little characters that can move around the game board by the remote controllers. The characters start in a little box with the dice.

Physical + digital!

Each player's controller moves their physical game piece on the board, which is connected by a magnet to the base.

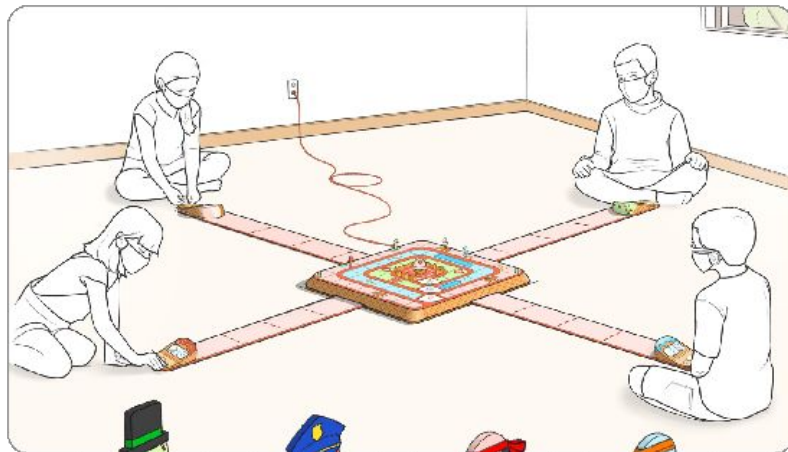

Enhanced experience!

Roll the dice, move your game piece forward, and collect coins from a safe social distance!

a socially distanced board game

Invented by Jonah Resnik

Mister Mint

Chief Cherry

Neapolitan Ninja

Blue Raspberry Runner

3 rounds!

Race around the board to collect your cone, ice cream scoop, and finally, toppings!

Slide ahead!

when you land on an ice cream truck, skateboard, or icy path

Collect coins!

when you work at the ice cream shop, or find a coupon or coins

Lose a turn...

when you get stuck in a caramel puddle, or drop your cone
