TACTILE**Design Concept:**

My idea is a painting game. Everyone gets an art station at a table. They start a timer and begin painting. After the timer beeps, the tabletop spins until the stations switch to the next person! They begin another round and add to the painting in front of them.

Paint + Rotate

An interactive painting game. Players start a timer and begin painting. After the timer beeps, the tabletop spins until the stations switch to the next person. They begin another round and add to the painting in front of them.
