“The Binoggles”

School: **Adlai Stevenson High School**

Educator: **Mark Lacombe**

Mentor:

Steve Schock

Sean Cannizzaro

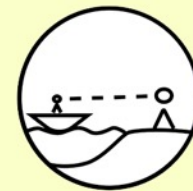

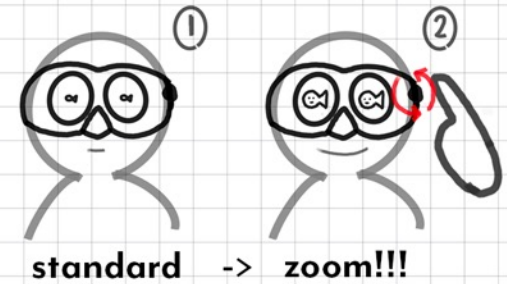

Design Concept:

The overall concept of my design is goggles with adjustable zoomed lenses with the main purpose of allowing the user to see more of the Great Lakes' wildlife, boats, kayaks, etc. While prioritizing their safety and convenience.

Binoggles

binoggles are the underwater goggles with a binocular lens function that let you experience underwater wildlife from far distances!

the dial on the side can be used for quick and easy adjustments, similar to a zoom lens on a camera

observe the great lakes **above and below** the surface!
